## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/38932

A. CLASSIFICATION OF SUBJECT MATTER  IPC(7) : G01N 24/00, 33/00  US CL : 436/173, 86						
According to International Patent Classification (IPC) or to both national classification and IPC						
B. FIELDS SEARCHED						
Minimum documentation searched (classification system followed by classification symbols) U.S.: 436/173, 86						
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched						
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) Please See Continuation Sheet						
C. DOCI	JMENTS CONSIDERED TO BE RELEVANT			Relevant to claim No.

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/38932

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)				
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
Claims Nos.:  because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)				
This International Searching Authority found multiple inventions in this international application, as follows:  Please See Continuation Sheet				
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  Remark on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.

DOW MY ODGED WATTONG WITTENE LINEARY OF INTRINSPOSE IS	CKING				
BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LA This application contains the following inventions or groups of inventions, whi concept under PCT Rule 13.1. In order for all inventions to be examined, the	ch are not so linked as to form a single general inventive				
Group I, claim(s) 1-12, drawn to a method for preparing derivatized peptides.					
Group II, claim(s) 13-16, drawn to a set of modified tryptic peptides.  The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature, i.e. a peptide labeled at N-termini with an acetamidine or a propionamidine group, is known in the art (see Bearsley et al., J. Proteome Research, 2003), and therefore is not a special technical feature. This makes the restriction proper.
